

DNA & MICROCHIP CLINIC

(OPEN TO ALL BREEDS)

This year we are offering Microchip and DNA clinics. These clinics will be conducted by ESAA member Fran Paulin, DVM. We will offer several 2 hour times slots throughout the week. Pre-registration is preferred so we can order the chips and DNA kits and also schedule adequate and convenient times for all who want to take advantage of these opportunities. Walk-ins will be accepted time permitting and will be worked in around those who have pre-registered and reserved a time slot.

DNA is required more and more. It is now required for many stud dogs and several breeds require it for entry into their Nationals. AKC is proposing that steps be taken to require all dogs to have DNA information on file. It is the wave of the future - and not the too distant future.

The microchips will be Home Again and the special discounted fee will include automatic registration with Home Again Pet Recovery Service.
